

WESCAM MX™-SERIES IN-FLIGHT TRAINING

Train from the source. Learn from the best.

Ensure your team is fully trained and at-the-ready when duty calls. Continuous education is essential to master the full capabilities of your WESCAM MX-Series electro-optical & infrared (EO/IR) System. Rise to operational mastery with WESCAM MX-Series In-Flight Training – delivered by the product experts at L3Harris.

IN-FLIGHT CURRICULUM OVERVIEW

- > Combined classroom and hands-on training - customized to students' aircraft, sensor and interface types
- > Focused on system configuration, operation and maintenance
- > System set-up, sensor selection, steering mode and mission logistics
- > Sensor optimization in specific mission scenarios
- > Real-life mission scenario role play:
 - day and night flights
 - varying lighting/atmospheric conditions
 - crew resource management
- > Maintenance and organizational-level maintenance tasking

SUITABILITY

- > Suitable and scalable for all levels of military and public service operators and maintainers, including those who are new to WESCAM MX systems

FLEXIBLE OPTIONS

- > Use your platform or L3Harris-supplied aircraft and sensors—keeping your equipment free for critical mission deployment
- > Train globally with varying duration periods
- > Choose from open enrollment (buy one to five seats) or a complete six-seat buyout
 - Six-seat buyout: train as a team and experience a completely customized curriculum designed for your exact turret, configuration and unique operational conditions
 - Open enrollment: a more generic curriculum for a combined class. Not specific to one turret model or unique operational conditions

IN-FLIGHT INSTRUCTION LED BY CERTIFIED TRAINERS

**HANDS-ON MISSION-EXPERIENCE,
TAUGHT FROM THE GROUND UP.**

Performance-based, interactive instruction customized to match your specific WESCAM MX-Series configuration:

- > Real-life, scenario-based modules
- > Lessons delivered in a small group format
- > Ideal for maintainers and operators of all WESCAM MX-Series products

YOU BOUGHT THE BEST. NOW TRAIN WITH THE BEST.

L3Harris' instructors are subject matter experts in both WESCAM MX-Series systems and modern education techniques. Your success depends on learning from those who have designed, engineered and built the WESCAM MX-Series systems.

Instructors are frontline operators who are up-to-date on changing technologies and product enhancements – ensuring students receive up-to-the-minute training.

Training from high-caliber operators enables a higher level of understanding, resulting in increased mission success rates and reduced equipment down time.

THE COMPLETE SOLUTION

Looking to participate in additional WESCAM MX-Series courses? L3Harris offers a variety of classes, led by by first-class operators and instructional designers.

COURSE OFFERINGS INCLUDE:

- > WESCAM MX System Familiarization
- > Intermediate Maintenance
- > Operator & Organizational Maintenance
- > WESCAM MX-Series eLearning
