

ELEVATORS

Ship Lifts & Aircraft Elevators

L3Harris is a leader in the development of multiple naval solutions. We design and manufacture elevators and lifting platforms for a wide variety of shipborne applications.

A COMPLEX TASK MADE SIMPLE

Transferring aircraft, ammunition and vehicles between hangar decks and flight decks is one of the most intricate and caution-sensitive operations to be performed on modern naval vessels. Thanks to extensive experience in supplying handling equipment on ships, L3Harris' aircraft elevators and ammunition lifts are the best solution on the market to perform such activity.

SHIP LIFTS

Ship lifts are designed for ammunition, food, waste and MEDEVAC.

- > SWL from 2 tons up to 20 tons
- > Platform dimensions: Up to 3 m (width) and 7 m (length)
- > Hydraulically or electrically operated
- > Provided as an integrated system including fireproof, gastight, spraytight doors and flight deck hatch
- > Used up to sea state 6

AIRCRAFT ELEVATORS

Aircraft elevators are designed to transport aircraft and equipment between the hangar and the flight deck.

- > Platform operated by cables and hydraulic cylinder
- > Automatic stanchions on hangar deck and flight deck
- > SWL up to 40 tons
- > Dimensions: Up to 14 m (width) and 15 m (length)
- > Mobile safety nets, signaling lights and lashing points integrated into platform design
- > Automatic folding of the platform to reduce the ship breadth
- > Used up to sea state 6 and shock-qualified
- > Classification Society approved (RINA)

L3HARRIS' AIRCRAFT ELEVATORS ARE ON-BOARD THE ITALIAN NAVY'S LHD.

The elevators are shock-qualified. They can also be used to transport:

- > Vehicle hosted on-board.
- > People
- > Loads
