

EASY ACCESS TO SYSTEM INTEGRATION (EASI)

Sync in Seconds

L3Harris makes Link 16 “EASI” for new users, field operators and warfighters operating at the tactical edge.

PRODUCT DESCRIPTION

EASI is a lightweight Link 16 network entry and display tool, specifically designed for novice Link 16 users and mobile/small form factor applications. EASI reduces operator inputs needed to join a Link 16 network by 50% compared to previous generation front panel applications. Optimized screen space maximizes operator situational awareness of radio functions without sacrificing features.

The screenshot displays the 'Network Setup and Entry' interface. At the top, there are navigation options: '< Home', 'Network Setup and Entry', and '• Network Ready'. Below this, there are three tabs: 'Setup' (selected with a green checkmark), 'Channels', and 'Additional Settings'. The 'Setup' section includes a 'Radio Connected' status indicator. The main configuration area contains several fields: 'Radio IP Address *' with the value '127.0.0.1', 'Port Number *' with '50010', 'Link 16 Load File *' with a dropdown menu showing 'EASI_Test_Init', 'STN (JU) *' with '111', 'Time Source *' with a dropdown menu showing 'Host', and 'Time (UTC)' with '19:10:42'. A blue 'Next →' button is located at the bottom right of the setup area.

EASI Network Setup

Enhancing Situational Awareness

KEY FEATURES

- > Designed to help novice Link 16 users:
 - Terminal setup
 - Network entry
 - Terminal troubleshooting
 - Advanced waveform configuration
 - CMI (crypto configuration)
- > Supported terminal types:
 - BATS-D (PRC-161)
 - STT (KOR-24)
- > BATS-D front panel display
 - Radio health at a glance
 - Network status
 - Reset IPF/NAV on the move

SPECIFICATIONS

Operating System(s)

- > Android 8+
- > WINDOWS 7/8/10/11

Supported Terminal Types

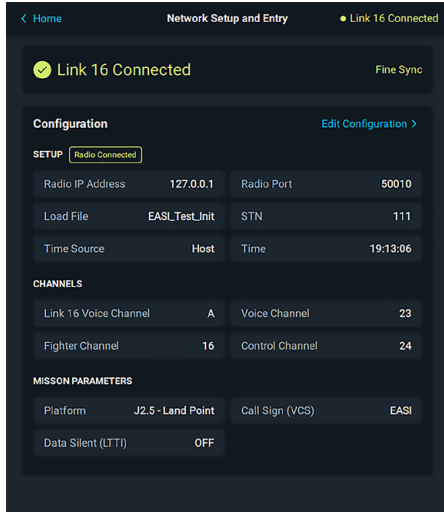

- > BATS-D (PRC-161)
- > STT (KOR-24A)

Supported Connections

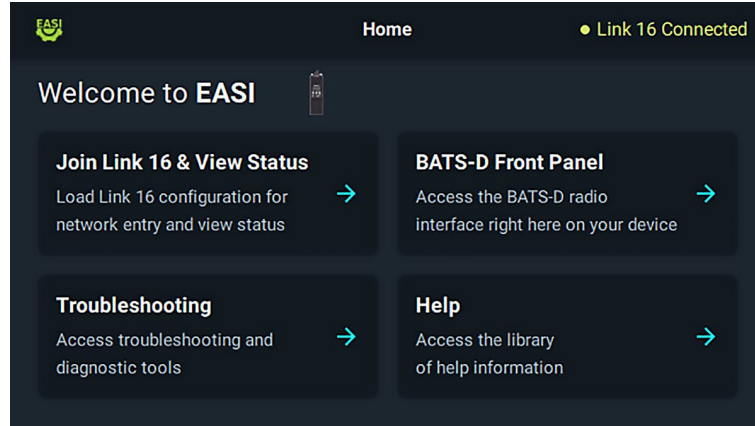

- > Ethernet
- > USB

Crypto-Mod Compliant

- > Advanced crypto management and configuration capable
