PILOTAPP

CREATING A SAFER AND MORE EFFICIENT OPERATION.

Highly customisable app that uses flight data to distribute personalised performance insights to pilots in a relevant and familiar format.

Embrace the next evolution in the use of flight data to significantly reduce your risk.

IMPROVE DECISION MAKING AND REDUCE RISK

> See a rapid decrease in your FDM/FOQA event rates

> Remove latency in the distribution of FDM/FOQA outputs

> Use preflight briefing tool to highlight known safety issues on the route

> Debrief using post flight safety performance metrics

> Inform pilots with push notifications to bring attention to Safety Alerts from the latest flights

> View internal safety initiative and airport-based insights

ENHANCE PILOT ENGAGEMENT

> Present complex flight data using aircraft instrument-based displays

> Drive greater engagement by equipping pilots with personalised data

> Dashboard brings attention to pilot performance relative to fleet peers and SOPs

> Display statistical trends in an easy-to-understand format

CUSTOMISE TO YOUR OPERATION

> Choose what data to share and the display formats

> Highly configurable to present messages that are meaningful to your operation

> Change your areas of focus over time to target new initiatives

L3HARRIS®
FAST. FORWARD.

REQUIREMENTS:

> iPad with iOS 15.1 or later

> iPhone with iOS 15.1 or later

> Deployable via Mobile Device Management (MDM)

> Raw FDR/QAR/WQAR Flight Data via SFTP

> Submission of Scheduling data to API

> Single Sign On (SSO) interoperability

CAPABILITIES

> Utilises L3Harris' proven FDM platform; used by 200 operators and hosts of IATA's FDX program

> Standalone capability that can run independently of your FDM program

> Pilot Identities and Data are secured by design

> Data is encrypted in transit and at rest

> Integrates with iOS app distribution tools and internal authentication systems

Find out how you can maximise engagement, reduce risk and optimise operational efficiency.
