

L3HARRIS.COM

L3HARRIS IS THE TRUSTED DISRUPTOR IN THE UK DEFENCE INDUSTRY

A Global Technology Leader

As the Trusted Disruptor, we innovate relentlessly and deliver capability with the speed, passion and determination that our customers demand in executing their most challenging missions.

L3HARRIS IN THE UK

From 11 U.K. sites, our team of nearly 1,000 people delivers unique capabilities across space, air, land, sea and cyber for military, security and commercial customers across the U.K. and worldwide.

As part of the RC-135 based Airseeker/Rivet Joint programme, we deliver strategic and tactical intelligence, surveillance and reconnaissance (ISR) capability. We provide comprehensive carriage, release and interfacing solutions to integrate weapons and stores onto crewed and uncrewed air platforms.

In the land domain, our T7 and T4 multi-mission robots deliver next-generation remote capabilities and uncompromised performance. We design and manufacture world-leading land force protection systems, cyber and electromagnetic activities (CEMA), electronic warfare (EW) and encryption capabilities.

We are the proud designer, supplier and maintainer of the 50,000 tactical radios in the Bowman tactical C4I system in service with the U.K. Armed Forces and are working to define and deliver the next generation system, Morpheus.

We provide warship automation systems through control and simulation solutions that are in service on Albion Class Landing Platform Docks and Queen Elizabeth Class Aircraft Carriers. More systems are being developed and delivered for Type 26 and Type 31e Frigates.

As the maritime industry's autonomy partner of choice, we are powering the Royal Navy's adoption of autonomous surface vehicle technology as well as delivering autonomous capability to U.K. ports, harbours and offshore energy service providers. We have delivered more than 100 autonomous surface vehicle (ASV) systems.

Our ISR sensors, communications systems and precision, navigation and timing solutions are at the heart of many of the most advanced space platforms, while our awareness and encryption tools ensure that we can protect and defend our most critical infrastructure in space.

Our cyber capabilities provide an information advantage in the fields of kinetic conflict, cyber warfare, force protection and counterterrorism.

LOCATIONS IN THE UK

- > Barrow-In-Furness
- > Brighton
- > Bristol
- > Burgess Hill
- > Farnborough
- > Faslane
- > Fleet
- > Mildenhall
- > Portchester
- > Tewkesbury
- > Waddington

OUR COMMITMENT TO SOCIAL VALUE

L3Harris is committed to fostering a safer, more sustainable future in the U.K., prioritizing environmental goals, equality and inclusion. Our U.K. ERGs unite employees to advance diversity and address critical issues, including support for women in defence and LGBT+ military personnel. We actively back key community groups such as Combat Stress and SSAFA through sponsorships, volunteering and donations, reinforcing our Armed Forces Covenant Pledge and supporting individuals in and out of service.

L3HARRIS®
FAST. FORWARD.

ADVANCED SOLUTIONS FOR UK CUSTOMERS ACROSS EVERY DOMAIN

SPACE:

- > Space Control
- > Situational Awareness

AIR:

- > Airborne Weapons Carriage and Release Systems
- > EO/IR Surveillance Systems
- > Signals Intelligence

LAND:

- > Tactical Communications Systems
- > Interoperable Communication Systems
- > Multi-mission Robotics
- > Signals Intelligence
- > Counter-UAS

SEA:

- > Warship Integrated Platform Management Systems
- > Multi-role Autonomous Surface Vehicles (ASVs)

CYBER:

- > Tactical Electronic Warfare and Cyber
- > Specialist Intelligence Networks
- > Protected and Secure Communications
- > Electronic Surveillance
- > Electronic Attack
- > Through-life Management

MULTI-DOMAIN:

- > Electronic Warfare
- > Systems Integration
- > Command and Control Networks
- > Strategic and Tactical Intelligence, Surveillance and Reconnaissance (ISR)
