

MAKE YOUR UAV PROGRAM FLY

Embeddables integration support

We make it fast and easy to integrate resilient control into your Group 1+ UAVs. Tap into already-available components, or customize our expertise to your requirements:

 **Embeddable Modules:** A family of small, lightweight, resilient radio control units right-sized for diverse airframes and missions.

 **Antennas:** UAV-optimized antennas designed to help test your chosen embeddable in the unmanned system.

 **Deployment Software:** Network, hardware and software tools that accelerate testing and fielding.

 **Integration User Guide:** Comprehensive best practices and how-to guidance designed to simplify your integration processes.

 **Cables and Adapters:** Ready-made cables and adapters that physically connect your chosen embeddable to the unmanned system.

 **Systems Engineering Support:** Need more technical support? Our experts are here to help simplify and guide the embeddable integration process for you.

Please contact your local sales representative to learn more.
