# XL VIRTUAL<sup>™</sup> MOBILE APPLICATION

Public Safety's Most Advanced  
P25 Push-To-Talk Application

## STAY CONNECTED WITHOUT BREAKING THE BANK

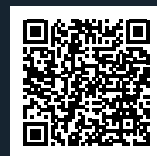

Command staff and administrators can stay in touch with Land Mobile Radio (LMR) network activities using PCs and mobile devices.

Behind a desk or behind a screen at incident command, the XL Virtual Windows Client allows users to stay in full, direct contact with their LMR system without the need for additional investment. XL Virtual runs as an application on PCs and smartphones but looks like an LMR radio to your system.

This makes XL Virtual the perfect solution for administrators needing to communicate or track location of team members without adding the expense of an additional LMR radio.

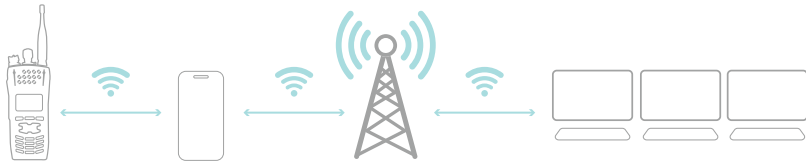

### A BRAND NEW EXPERIENCE

Big news! BeOn, the industry's pioneering app for real-time group communications, has evolved. BeOn is now XL Virtual. A new name and new look, same integrated experience.

BeOn is now  
XL VIRTUAL™

# EXTEND LMR COVERAGE BEYOND REGIONAL BOUNDARIES

XL Virtual is an essential enhancement to P25 and legacy network systems.

XL Virtual allows users to maintain a full set of advanced LMR features on an ordinary smartphone and will work anywhere in the world where Wi-Fi or cellular data service is available—regardless of the carrier.

This advanced Push-To-Talk (PTT) application is supported on iOS™, Android™ and Windows® and is integrated into the L3Harris XL-185P and XL-200P LTE radios. This extends the range of the XL portables' coverage and allows users to leverage broadband to improve situational awareness.

XL Virtual can quickly be added to existing VIDA® networks as a core service, or deployed on legacy and non-L3Harris LMR networks via gateways.

By utilizing the capacity of broadband networks, XL Virtual helps divert traffic from narrowband communications, providing an additional level of redundancy for those systems while reducing traffic load on the LMR system.

## CONNECT YOUR ENTIRE TEAM

Efficiently connect your entire team to instant communications with the most capable feature set on the market.

- > Display location of LMR radios
- > Full AES end-to-end encryption
- > Supports group and individual voice calls
- > Distress indication
- > Announces group calls
- > Instant recall/call logging
- > Console/supervisory override
- > Talkgroup scanning
- > Late call entry
- > P25 confirmed call
- > Priority/preemptive support
- > P25 OTAR key management
- > Console patch/simulselect
- > Group location
- > User presence indication
- > Location privacy
- > XL Virtual text messaging

# A TRULY INTEGRATED P25 EXPERIENCE

When an app genuinely integrates with a network, it means seamless collaboration for your entire team.

XL Virtual bridges the gap between broadband and radio networks. It enables instant push-to-talk (PTT) communication across various devices (smartphones, radios, computers) ensuring important communications flow quickly and securely among everyone on your team.

### When XL Virtual is integrated into your P25 system:

- > Public safety officials stay connected, even when not carrying a ruggedized radio
- > Undercover agents can communicate discreetly with smartphones and earbuds
- > Support personnel can communicate using devices they're already assigned
- > Educators connect immediately with authorities in a crisis event

Enhance communication efficiency, flexibility, and security across your entire team by integrating XL Virtual with P25.
